

# Performance Validation LLC

*Serving the Life Science Industries since 1988*

---

## **For Immediate Release**

Performance Validation is pleased to announce that Daniel Cornpropst has completed all required course work and has obtained his Six-Sigma Green belt certification through the University of California.

The Six Sigma certification consists of five different classification levels, black belts, master black belts, green belts, yellow belts and white belts. The role of the Green Belt is to:

- ❖ Assists with data collection and analysis for Black Belt projects, and
- ❖ Lead Green Belt projects or teams.

The course of instruction prepares candidates for the role of Green Belt through hands-on training in tools and techniques in project selection and definition, stakeholder engagement, data gathering, statistical analysis, solution development and the implementation of lasting change.

As a Green Belt Daniel will play a key role in the success of Performance Validations Six Sigma program, and be available to assist our Life Science customers as a member of their Black Belt teams, or as a Green Belt project lead.
